Draft 9/10/51

PSYCHOLOGICAL STRATEGY BOARD

Panel B

Report of Group I: Inventory of Cold War Weapons

1. The members of Group I, in accordance with its instructions, prepared a check list of cold war weapons now in use or which might be employed by the U. S. Government (See Annex 1) and a description of the agencies responsible for the use and coordination of these weapons. (See Annex 2).

2. It was at once apparent that the mere listing of these weapons, without an accompanying estimate of their relative value, description of the extent of their use in current operations and appraisal of the strong and weak points in our coordination arrangements would be of little help to the PSB in its task of assessing the effectiveness of our effort and devising a program for its improvement.
